

Software Engineer

True Image Interactive Development Team

Overview

True Image Interactive is looking for a junior to mid-level software engineer to assist us in developing software that revolutionizes the way people communicate with technology.

Responsibilities

- Designing, coding, and testing technical solutions.
- Meeting aggressive development deadlines and schedules.
- Documenting application functionality and programming.
- Creating and executing unit, integration and system test scripts, manual and automated.
- Managing day-to-day tasks productively.
- Other duties as assigned.

Desired Skills & Experience

- BS in Computer Science or other technical discipline, or the equivalent in work experience.
- 3+ years of object oriented software development experience in building Java based applications using Spring framework (Data, MVC, Boot a plus)
- Experience with ORM technology such as Hibernate, EclipseLink or other similar.
- Experience with JavaScript (AngularJS or jQuery a plus)
- Experience with database technologies including: MySQL (MongoDB a plus)
- Experience with RESTful Design Patterns
- Demonstrated ability to transition between multiple products as needed
- High energy, passionate team player with excellent verbal and written communication skills

- Detailed understanding of common architectural and design patterns and the ability to establish high quality practices among the team members.
- Experience working within an Agile environment with a geographically distributed team a plus
- Experience with unit testing frameworks such as JUnit, Jasmine and Protractor
- Must be able to work independently as well as in a group to solve problems
- High initiative and self-motivated to exceed project expectations.
- Experience working in an Application Service Provider (ASP) or Software as a service (SaaS) environment a plus.
- Proven people skills with an emphasis on teamwork.
- Passionate about creating great software.

About True Image Interactive

True Image Interactive (formerly GetAbby) is revolutionizing the way people connect with technology using the world's first HUMAN Intelligent Virtual Assistant. Combining the proven power of human interaction to engage customers and guide informed decision-making with our proprietary artificial intelligence, natural language processing, and speech recognition technology, our human avatars are redefining automated, cross-channel self-service and creating some pretty impressive results for client partners across healthcare, call centers, retail, and beyond.
