

Senior Software Engineer

True Image Interactive Development Team

Overview

True Image Interactive is looking for a junior to mid-level software engineer to assist us in developing software that revolutionizes the way people communicate with technology.

Responsibilities

- Designing, coding, and testing technical solutions
- Identifying system deficiencies and recommending solutions
- Meeting aggressive development deadlines and schedules
- Creating prototypes for business user approval
- Documenting application functionality and programming
- Creating and executing unit, integration and system test scripts, manual and automated
- Accurately preparing written business correspondence that is coherent, grammatically correct, effective, professional and engaging
- Managing day-to-day tasks productively, without management direction
- Passion and proven ability to learn new technologies as needed
- Other duties as assigned

Desired Skills & Experience

- BS in Computer Science or other technical discipline, or the equivalent in work experience
- 5+ years of object oriented software development experience in building Java based applications on Spring framework (Data, MVC, Boot a plus) or similar frameworks
- Experience with ORM technology such as Hibernate, EclipseLink or other similar
- Experience with JavaScript (AngularJS or jQuery a plus)
- Experience with database technologies including: MySQL (MongoDB a plus)

- Experience with RESTful Design Patterns
- Demonstrated ability to transition between multiple products as needed
- High energy, passionate team player with excellent verbal and written communication skills
- Detailed understanding of common architectural and design patterns and the ability to establish high quality practices among the team members
- Experience working within an Agile environment with a geographically distributed team a plus
- Extreme prejudice for writing highly efficient server side code
- Experience with unit testing frameworks
- Must be able to work independently as well as in a group to solve problems
- High initiative and self-motivated
- Experience working in an Application Service Provider (ASP) or Software as a service (SaaS) environment
- Proven people skills with an emphasis on teamwork
- Strong oral and written communication skills
- Passionate about creating great software

About True Image Interactive

True Image Interactive (formerly GetAbby) is revolutionizing the way people connect with technology using the world's first HUMAN Intelligent Virtual Assistant. Combining the proven power of human interaction to engage customers and guide informed decision-making with our proprietary artificial intelligence, natural language processing, and speech recognition technology, our human avatars are redefining automated, cross-channel self-service and creating some pretty impressive results for client partners across healthcare, call centers, retail, and beyond.
